Pressed Powder

INVISIBLE POWDER

An ultra-delicate, transparent powder that not only sets makeup but, when paired with foundation, gives the skin a satin finish that looks great in any light.

It works like a retouch – filling in fine lines and wrinkles, reducing the appearance of pores, and giving the face a subtle glow.

The talc-free formula ensures a perfect matte finish without weighing down the skin, while also extending the longevity of your makeup.

Innovative formula:

- ♥ The talc-free formula provides a perfect matte finish without weighing down the skin, while also extending the longevity of your makeup.

Remember ;)

Always apply at the end of your makeup, as the proverbial „cherry on top.“ The easiest way is to use a large brush with a flattened head or a puff.

Depending on the effect you want to achieve, you can either sweep it across the face or gently press it into the skin. In the first case, the finish will be more natural and subtle. On the other hand, the stamping technique works better if you want to set your makeup more firmly and mattify the skin.
